

**Purpose**

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

**Product** FX Long Call Option  
**Manufacturer of the product** Union Bancaire Privée, UBP SA / www.ubp.com/en/contact-us / call +41 58 819 21 11 for more information  
**Competent Authority:** Swiss Financial Market Supervisory Authority FINMA  
 Date of production of the KID: 19.09.2024

**You are about to purchase a product that is not simple and may be difficult to understand**

**1. What is this product?**

**Type**

An Over the Counter (OTC) contract – Foreign Exchange Instrument under Swiss Law

**Term**

The product has a fixed lifetime and will be due on the Maturity Date.

**Objectives**

The objective of this product is to allow the holder to get exposed to a specific currency pair AND/OR manage the adverse movements that it may experience. Note that it may not provide you with complete protection against such exposures. The product achieves its objectives by Union Bancaire Privée, UBP SA agreeing the terms of an OTC contract with you under which you will pay an upfront cash payment (Premium) in exchange for the potential benefit from an increase of the underlying at the maturity.

The product achieves its objectives as follows:

At maturity, Union Bancaire Privée, UBP SA will compare the Reference Price of the underlying to the Strike Price. The final settlement at maturity consists of:

1. If the Reference Price is at or below the Strike, no amounts are payable from either party.
2. If the Reference Price is above the Strike, Union Bancaire Privée, UBP SA will either make a payment to you computed as the difference between the Reference Price and the Strike multiplied by the Notional Amount, or deliver the currency to you for the Notional Amount of the option at the Strike price.

Sample parameters and pre-agreed circumstances and conditions are set out below:

<b>Currency Pair</b>	EUR-USD
<b>Notional Amount</b>	100,000.00 EUR
<b>Term of the Contract</b>	1 year
<b>Strike Price</b>	1.1289
<b>Premium</b>	4,720.49 EUR

Union Bancaire Privée, UBP SA is entitled to terminate the product with immediate effect, if an extraordinary event occurs. Examples of extraordinary events include, but are not limited to, changes in legislation, tax events, and the discontinuation of the UBP's ability to carry out the necessary hedging transactions. In this case, the termination amount may possibly be significantly below the Notional Amount. You may also only be able to reinvest the termination amount on less favourable terms.

**Intended retail investor**

The product is intended for retail investors who pursue the objective of general asset formation / asset optimization and have a short-term investment horizon. This product is a product for clients with advanced knowledge of, and / or experience with financial products and the FX market. The investor may bear losses up to the total amount of the premium invested and attaches no importance to a capital protection. In the risk and return assessment, the product is in risk class 7 on a scale of 1 (safety-oriented, very low to low yield) to 7 (very risky, highest return).

**2. What are the risks and what could I get in return?**

**Summary Risk Indicator**

- ! The summary risk indicator assumes you keep the product until maturity. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early.

The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level, and poor market conditions are very unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

**Performance Scenarios**

**Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.**

**Recommended holding period:**

**1 year**

**Example investment:**

**EUR 10,000.00**

If you redeem at maturity

## Scenarios

**Minimum**                      **There is no minimum guaranteed return. You could lose some or all of your investment.**

<b>Stress scenario</b>	<b>What you might get back after costs</b>	<b>0 EUR</b>
	Average return each year	-100.0 %

<b>Unfavourable scenario</b>	<b>What you might get back after costs</b>	<b>0 EUR</b>
	Average return each year	-100.0 %

<b>Moderate scenario</b>	<b>What you might get back after costs</b>	<b>0 EUR</b>
	Average return each year	-100.0 %

<b>Favourable scenario</b>	<b>What you might get back after costs</b>	<b>16,890 EUR</b>
	Average return each year	68.9 %

This table shows the money you could get back at maturity, under different scenarios, assuming that you invest EUR 10,000.00.

The scenarios shown illustrate how your investment could perform. You can compare them with scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

### 3. What happens if the issuer is unable to pay out?

You are exposed to the risk that the issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or where an administrative order is imposed. In a case where the issuer is experiencing financial difficulties, such order can also be issued by a resolution authority in the run-up to an insolvency proceeding. The resolution authority has extensive powers in this regard. It may, inter alia, waive or suspend the investors' rights and/or terminate the product. With regard to the basic ranking of the issuer's obligations in the event of action by the resolution authority, please see [www.finma.ch/en](http://www.finma.ch/en). A total loss of your capital invested is possible. The product is not covered by any investor protection or guarantee scheme.

### 4. What are the costs?

The costs shown in the table above represent how much the expected costs of the product would effect your return, assuming the product performs in line with the moderate performance scenario.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product [and how well the product does]. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- ◆ EUR 10,000.00 is invested
- ◆ You would get back the amount that you invested (0 % annual return).

	<b>If you cash in after 1 year (Recommended holding period)</b>
--	---------------------------------------------------------------------

<b>Total costs</b>	<b>Up to 636 EUR</b>
--------------------	----------------------

<b>Annual cost impact*</b>	<b>6.8 %</b>
----------------------------	--------------

\* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you redeem at the recommended holding period your average return per year is projected to be 6.8 % before costs and 0.0 % after costs.

#### Composition of Costs

<b>One-off costs upon entry or exit</b>	<b>If you redeem after 1 year</b>
-----------------------------------------	-----------------------------------

<b>Entry costs</b>	The impact of the costs already included in the price. This includes the costs of distribution of your product.	636 EUR
--------------------	-----------------------------------------------------------------------------------------------------------------	---------

<b>Exit costs</b>	The impact of the costs of exiting your investment when it matures.	n.a.
-------------------	---------------------------------------------------------------------	------

#### Ongoing costs taken each year

<b>Management fees and other administrative or operating costs</b>	The impact of the costs that we take each year for managing your investments and the costs presented in Section II.	n.a.
--------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------	------

## 5. How long should I hold it and can I take money out early?

Recommended holding period: This contract is designed to be held to the agreed maturity date in order to match your investment requirement. It is a contract designed to be entered into for its term. Early termination may occur (i) if certain events of default or other termination events occur or (ii) at the sole discretion of UBP, in which case early termination payments may apply.

Early exit impact:

If the contract is terminated early, in whole or in part, an Early Termination Payment may become payable by either you or UBP. The Early Termination Payment is linked to market parameters and could be a substantial loss or gain to you. Settlement on early termination will be specific to the product and will be influenced by a number of factors which include but are not limited to: whether it is an increasing or decreasing foreign exchange rate environment; the movement of the FX Spot Rate since the transaction Trade Date; the amount affected by the early termination. The Early Termination Payment is not a penalty charge.

The sum represents the economic value of what UBP would have paid or received if the product continued as agreed. Depending on market conditions at the time of the early termination, the settlement calculated could result in a substantial amount being due from you to UBP.

## 6. How can I complain?

Any complaint regarding the person advising on, or selling, the product can be submitted directly to that person via the relevant website.

Any complaint regarding the product or the conduct of the issuer of the product can be submitted in text form (e.g. by letter or e-mail) to UBP under the following address: Union Bancaire Privée, UBP SA, Rue du Rhône 96-98, P.O. Box 1320, 1211 Geneva 1, Switzerland, or [ubp@ubp.ch](mailto:ubp@ubp.ch), or [www.ubp.com/en/contact-us](http://www.ubp.com/en/contact-us).

## 7. Other relevant information

Any additional documentation in relation to the product and in particular the base prospectus, any supplements thereto and the final terms may be obtained free of charge at the following address : Rue du Rhône 96-98, P.O. Box 1320, 1211 Geneva 1, Switzerland. The base prospectus is also available at [www.ubp.com/en/legal-aspects/information-for-ubp-clients#titre\\_7](http://www.ubp.com/en/legal-aspects/information-for-ubp-clients#titre_7). In order to obtain more detailed information – and in particular details of the structure of and risks associated with an investment in the product – you should read these documents.

The information contained in this Key Information Document does not constitute a recommendation to buy or sell the product and is no substitute for individual consultation with your bank or advisor.
